

ZICT(G) Took Delivery of Two Super-Post-Panamax Quay Cranes and Six Electric Rubber-Tyred Gantry Cranes

On 25 October, ZPMC's Zhen Hua 22 transport ship arrived at ZICT(G) carrying two super-post-Panamax quay cranes and six electrified rubber-tyred gantry cranes (eRTGC). This is the second batch of equipment to arrive at the port for ZICT(G)'s Phase II project.

The twin-lift quay cranes have 51-tonne lift capacities and outreaches of 60 metres, allowing them to extend across 22 containers and handle the largest ships afloat. Meanwhile, the eRTGCs run on electricity instead of diesel, resulting in lower emissions.
